PROFILE

Full Stack Developer who enjoys solving problems and building real-world applications. I have a strong foundation in Data Structures and Algorithms, and hands-on experience developing scalable web apps using React.js, Node.js, and REST APIs. I'm passionate about writing clean, efficient code and continuously improving my skills.

EDUCATION

Canara Engineering College

B.E. Information Science - CGPA: 8.75

2021 – 2025

Mangaluru, Karnataka

Vivekananda Pre-University College

Class XII - 94.67%

2019 – 2021

Puttur, Karnataka

Sri Sathya Sai Loka Seva High School

Class X - 92.67%

2019

Alike, Karnataka

SKILLS

Programming: Java, C, JavaScript, TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Frameworks: Next.js

Core CS: Data Structures, Algorithms, OOP, DBMS

Backend: Node.js, REST API Development

Database: SQL

EXPERIENCE

FareFirst

June 2025 – Present

Web Developer

- Developed scalable frontend applications using React.js and Tailwind CSS, improving page load performance by 25%.
- Integrated REST APIs to enable real-time travel search functionality, enhancing user experience and reducing response latency.
- Optimized UI components and resolved production issues, improving application stability and performance.
- Collaborated on feature development for booking workflows used by active users.

PROJECTS

Conversational Flight Search Assistant — Node.js, OpenAI, MCP

- Built an AI-powered flight search assistant supporting natural language queries using OpenAI APIs.
- Designed backend architecture (MCP server) to process prompts and fetch real-time flight data.
- Developed dynamic UI components displaying structured flight results including routes, pricing, and airline details.

Full-Stack Task Manager with Auth — React.js, Node.js, Express, SQL

- Developed a full-stack task management platform with JWT authentication, role-based access and secure protected routes.
- Built RESTful APIs using Node.js and Express.js with optimized SQL queries for efficient task and user management.
- Created a responsive React.js interface with task filtering, real-time updates, and seamless cross-device user experience.

Disk Monitoring and Clean-Up System — UiPath (RPA)

- Developed an automation system to monitor disk usage and perform cleanup operations.
- Implemented automated alerts and file workflows improving storage efficiency.

CERTIFICATIONS

- Problem Solving through Programming in C (NPTEL)
- Programming in Java (NPTEL)
- Finishing School for Employability (Infosys Foundation - RPA)
- Full Stack Web Development Certification (Udemy)
